Fig 10

Figure 1 is a Kaplan-Meier survival plot showing the percentage survival of mice over 90 days for various treatment groups. The y-axis is labeled '% Survival' and ranges from 0 to 100. The x-axis is labeled 'Time (Days)' and ranges from 0 to 90. A horizontal dotted line at 50% survival indicates the median survival time. The legend lists the following groups:

- HBS
- INX-6295 (2 mg/kg)
- INX-6295 (5 mg/kg)
- AS4200/INX-6295 (2 mg/kg)
- AS4200/INX-6295 (5 mg/kg)
- AS4204/INX-6295 (2 mg/kg)
- AS4204/INX-6295 (5 mg/kg)
- INX-6300 (5 mg/kg)
- AS4200/INX-6300 (5 mg/kg)
- AS4204/INX-6300 (5 mg/kg)

The plot shows that the HBS group (filled circles) has the highest survival, remaining at 100% until day 40. The INX-6295 (2 mg/kg) group (open circles) shows a sharp decline in survival starting around day 25, reaching 0% by day 40. The AS4200/INX-6295 (2 mg/kg) group (filled squares) shows a sharp decline starting around day 25, reaching 0% by day 45. The AS4204/INX-6295 (2 mg/kg) group (open squares) shows a sharp decline starting around day 25, reaching 0% by day 50. The AS4200/INX-6295 (5 mg/kg) group (filled diamonds) shows a sharp decline starting around day 25, reaching 0% by day 55. The AS4204/INX-6295 (5 mg/kg) group (open diamonds) shows a sharp decline starting around day 25, reaching 0% by day 60. The INX-6300 (5 mg/kg) group (open triangles) shows a sharp decline starting around day 25, reaching 0% by day 65. The AS4200/INX-6300 (5 mg/kg) group (filled triangles) shows a sharp decline starting around day 25, reaching 0% by day 70. The AS4204/INX-6300 (5 mg/kg) group (open triangles) shows a sharp decline starting around day 25, reaching 0% by day 75.

◆ HBS      ■ 2 mg/kg free c-myc      ■ 2 mg/kg c-myc/AS4200
